Mr. R. S. Kruse, Tech. Ed., CST,  
The American Radio Relay League,  
Hartford, Conn.

Dear O. R. L.

I know you are awfully busy, but I can't help feeling worried because I have received no reply to my letters of February 19th, and February 24th. The subject of these letters was my paper on "Modulator Reactor Design" which I sent you on Feb. 5th.

I told you before that this was my first attempt, so I have no idea of the length of time that usually elapses, or of much else in connection with the matter.

Bad news can be borne more easily than suspense, so ring the bell for -dan and give me the low down.

73,

A. F. Waring, INY
